DETAILED ACTION

Receipt is acknowledged of the Appeal Brief, received by the Office May 14, 2002.

After careful reconsideration, the examiner withdrawn the finality of paper number 9, and new rejections follow.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-8, and 13-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over FR 2 724 844 to Meignant *et al.* in view of US Patent 5,576,021 to Andob *et al.* OR US Patent 4,493,822 to Tovey OR Remington's Pharmaceutical Sciences.

Meignant et al. disclose a therapeutic composition of vitamins and calcium, in the form of tablets, comprising elemental calcium and at least one vitamin D. Meignant et al. further teach that the calcium is present in salt form, and can be calcium carbonate, calcium pidolate, calcium chloride, calcium glycerophosphate, calcium lactate, calcium citrate, calcium gluconate or calcium phosphate (p 11, claim 2). Meignant et al. also teach that the vitamin D can be in the form of vitamin D₂ or D₃ (page 11, claim 3). Additionally, Meignant et al. teach the inclusion of well known excipients, such as binders, lubricants, diluents, and flavor agents (p 2, 120-35). Meignant et al. also teach that the formulation can be in tablet or sachet form (p 13, claim 13).

Art Unit: 1615

Lastly, Meignant et al. teach a process for making the formulation, including granulating the components and mixing them together, prior to making the final dosage form (p 13, claim 14).

Meignant et al. teach 1250 mg of calcium carbonate (which corresponds to 500 mg of elemental calcium) and 4 mg of vitamin D3 (which corresponds to 400 IU). This fulfills the ratio requirement of applicant's instant claim 1. The claim states that the calcium salt must be present in a ratio of 1-2 g of elemental calcium for each 500-1000 IU of vitamin D. Meignant et al. teach the identical ratio, as the amounts are simply divided by 2. Therefore, Meignant et al. teach the weight requirements of applicant's instant claims.

Meignant et al. do not teach each of the binders claimed by applicant. However, Meignant et al. do teach the presence of a very well known pharmaceutical binder, polyvinyl pyrrolidone.

Andoh et al., teach an improved oral dosage form. This reference is relied upon for the teachings of equivalency between polyvinyl pyrrolidone and polyethylene glycol as tablet binders. See column 9, claim 4, and column 10, claim 12.

Additionally, Tovey teach pharmaceutical dosage units. Tovey is also relied upon for the teaching of equivalency between polyvinyl pyrrolidone and polyethylene glycol as tablet binders. See column 5, lines 1-13.

Additionally, Remington's Pharmaceutical Sciences discloses a list of binders to be used in pharmaceutical formulations. Remington's teaches polyvinyl pyrrolidone, polyethylene glycol, and waxes. It is the position of the examiner that the disclosure to waxes teaches the equivalency between PVP, PEG, and liquid paraffin. See page 1635, column 2, last 2 paragraphs.

Art Unit: 1615

It is the position of the examiner that absent comparative scientific data teaching otherwise, one of ordinary skill in the art would have been motivated to use any well known tablet binder in the composition of Meignant *et al.*, with the same expected result, especially because Meignant *et al.* teach that their invention is useful for the same purpose of combating osteoporosis as applicant's composition. This is reiterated with the teachings of equivalency provided by Andoh *et al.*, Tovey, and Remington's. There has been no comparative evidence provided to convince the examiner that the use of one binder versus another would provide patentable distinction between the instant application and the cited prior art. The examiner recommends that applicant submit some evidence comparing the prior art to the instantly claimed formulation, in order to overcome this rejection. For the above reasons, this rejection would have been *prima facie* obvious to one of ordinary skill in the art at the time the invention was made.

Allowable Subject Matter

Claims 9-12 are allowed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amy E Pulliam whose telephone number is 703-308-4710. The examiner can normally be reached on Mon-Thurs 7:30-5:00, Alternate Fri 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman Page can be reached on 703-308-2927. The fax phone numbers for the
